

## Database Developer and Analyst – Vancouver

This year, Odlum Brown celebrates its 99<sup>th</sup> anniversary as an independent, employee-owned, full-service investment firm. We are honoured to be recognized as one of Canada's Best Managed Companies for 22 consecutive years and as one of Canada's Most Admired™ Corporate Cultures.

### CULTURE AND VALUES

We are very proud of the vibrant culture that we have built and sustained for many years. It's the way we do things, how we make decisions and what defines which behaviours work and don't work – it's what makes up our DNA.

Our values are the cornerstone of our culture, a set of principles that provide a compass for our actions and unify us as a team.

### PEOPLE

We have skiers, mountain bikers, hockey players, runners, volleyball players, movie buffs, bookworms, animal lovers, musicians, yogis, world travelers and every other variety of person you can imagine. You will work with really interesting people and make great friends, too.

### COMMUNITY

We are serious about supporting the communities where we live and work. In 2020, Odlum Brown was the recipient of the Canada's Volunteer Award in the Business Leader category for British Columbia and the North. This national recognition by the Canadian government is the result of our team members' actions and continued support for various causes and organizations in our communities. We are committed in heart and mind to everything we do in the community, and we work hard to inspire passion and fun while doing it.

### PROFESSIONAL DEVELOPMENT

Continuous learning matters. We are committed to providing career-long support for learning and growth.

### THE OPPORTUNITY

**We have an opportunity for a Database Developer and Analyst to join our award-winning firm in the Vancouver office.**

Reporting to the Vice President, Business and Technology Solutions, you will be part of the Business and Technology Solutions team. The ideal candidate is a motivated, client-service focused self-starter, with strong SQL Server administration and data development experience.

You will work in a fast-paced, multi-tasking environment, developing and supporting our production enterprise database environment. You will work closely with team members to troubleshoot and resolve any production process issues, as well as manage, monitor and maintain the corporate database. In addition, you will work on projects to enhance and provide solutions from the corporate database with an initial focus on reporting. This position may require support work after business hours.

## RESPONSIBILITIES

- Design and develop database components for small- to medium-sized projects under the direction of the Data Architect
- Develop enhancements and break-fixes to existing ETL and reporting architecture
- Perform unit tests on developed solutions to ensure they are production ready
- Identify and resolve data-related issues
- Provide support to database servers on a scheduled basis
- Provide a positive experience of database services and support being delivered to clients and business stakeholders
- Participate in the change management process by communicating technical impacts of database changes
- Monitor the various servers and databases to ensure that any issues can be addressed in a proactive manner
- Clearly communicate service outages and advisories to clients and business stakeholders in a timely fashion
- Manage security and access to servers and databases
- Provide assistance to project teams as required

## KNOWLEDGE AND EXPERIENCE

- 1-3 years of experience with SQL Server 2016-2019 administration and development using T-SQL is preferred
- Data modeling online transactional processing (OLTP) and data warehouse schemas
- ETL development using SQL Server Integration Services (SSIS)
- Report development using SQL Server Reporting Services (SSRS)
- Exceptional system analysis and troubleshooting skills
- Reliable team player who enjoys collaborating with others as well as working independently
- Excellent verbal and written communication and client service skills
- Ability to work efficiently and accurately in a fast-paced, dynamic environment with a sharp eye for detail
- Experience with Salesforce, SQL Server Analysis Services, Power BI or other BI tools is an asset
- B.Sc. in Computer Science or similar program related to database administration is an asset

Our team is growing, and we've got room for one more if you're interested. If this sounds like the environment you'd like to work in and you have the credentials and experience for this job, we invite you to submit a cover letter and resume to [hr@odlumbrown.com](mailto:hr@odlumbrown.com) by **May 27, 2022**.

Candidates must be legally eligible to work in Canada. Full disclosure of any restrictions must be disclosed at the time of expressing interest and supporting evidence provided prior to any potential offer of employment.

We appreciate your interest and thank you for taking the time to consider this opportunity. We will be in touch with individuals whose profiles most closely match what's needed to be successful in this role.
